Full Stack Developer
UI/UX Designer
2D/3D Digital Artist
Project Manager
Carpenter
Welder
Fabricator
Adventure Guide/Traveler
Fire Performer
Electronic Musician
Jazz Pianist

Hey, I'm Seph and I'm trying to understand and be capable of doing everything. Because of this, my interests and skills are all over the place. I've done a lot of odd jobs and it usually comes as a surprise when I'm the guy who can park the trailer or fix pretty much anything. I also learn incredibly quickly because I've started from scratch so many times.

Of all the things in life I value, I think the most important is that I'm not wasting my time. Life is short, but the experiences are vast, diverse, and endless.

Ideally, I would like a job that is up to date technologically and strives to create a symbiotic relationship between itself and its customers.

Idealistically, I would like to work with music and those kinds of things which impact people in deep, long lasting ways.

Overall, I'd just like to leave this world improved and have a good time while I'm at it.

Employment History
